Abilities

The Hitman and the Seer

Edit

INNATE: Aphelios has access to an arsenal of 5 *Moonstone Weapons*, created by his sister **Alune**. He equips two weapons at any one time, one as his **main weapon** and one as his **off-hand**. Each weapon has a unique basic attack and passive effect.

Aphelios begins the game with Caliburn as his **main weapon** and Severum in his **off-hand**, with Gravitum, Infernum, and Crescendum queued in reserve. The queue order can be rearranged based on weapon usage.

INNATE - MOONLIGHT: Weapons spawn with 50 *Moonlight* for ammunition, which is consumed on basic attacks on-attack or to cast his abilities. Abilities that cause **Aphelios** to attack do not cost additional *Moonlight* on top of their ability cost. Once his **main weapon** is exhausted of *Moonlight*, it is moved to the end of the queue and **Aphelios** assembles his next available weapon over 1

second to equip it from his reserve, with its  ability being placed on a 1.5-second  cooldown before that time. **Aphelios** cannot cast  Phase during the assembly.

INNATE - WEAPON MASTER: **Aphelios** cannot improve his abilities with skill points. He starts the game with  Phase and gains access to  abilities at level 2 and  Moonlight Vigil at level 6, with the latter improving automatically at levels 11 and 16. Instead, **Aphelios** may spend his skill points to gain  **bonus attack damage**,  **bonus attack speed** or  **lethality**.

Weapons of the Faithful

Edit

The active effect of **Aphelios'**  varies based on his current main weapon.

The individual actives do not share a cooldown.

Calibrum, the Sniper Rifle

Edit

COST: 1 MOONLIGHT PER ATTACK

Aphelios gains  100 **bonus** attack range while **Calibrum** is his main weapon. Enemies damaged by **Calibrum** through an ability are marked for 4.5 seconds,  revealing them for the duration. **Aphelios'** next basic attack against a marked target uses the current **off-hand** weapon and has  1800 range, increased missile speed, and a brief cast time that lasts shorter based on **Aphelios'** proximity to the target.

The empowered attack will consume the marks from all targets, dealing 15 (+ 20% **bonus AD**) **bonus physical damage** to the main target for each

mark consumed. If **Calibrum** is the current **off-hand** weapon, the **main weapon** is used for the attack instead.

▶ "Calibrum."

Moonshot

COST: 10 MOONLIGHT + 60 MANA **COOLDOWN:** 10 – 8 (BASED ON LEVEL)

CAST TIME: 0.4 **TARGET RANGE:** 1450 **WIDTH:** 120 **SPEED:** 1850

ACTIVE: **Aphelios** fires a bolt of energy in the target direction that deals **60 – 160 (based on level) (+ 42% – 60% (based on level) bonus AD) (+ 100% AP) physical damage** to the first enemy hit.

Map-Specific Differences Video

Severum, the Scythe Pistol

Edit

COST: 1 MOONLIGHT PER ATTACK

Basic attacks with **Severum** are non-projectile and have an uncancellable windup. **Severum's** attacks heal **Aphelios** for **2% – 7.1% (based on level) of the post-mitigation damage dealt, increased to 5% – 17.75% (based on level)** for attacks from abilities.

Healing from **Severum** in excess of **Aphelios'** **maximum health** is converted into a shield for an amount of up to **10 – 140 (based on level) (+ 6% maximum health)**, lingering for up to 30 seconds.

▶ "Severum."

Onslaught

Edit

COST: 10 MOONLIGHT + 60 MANA **COOLDOWN:** 10 – 8 (BASED ON LEVEL)

CAST TIME: NONE **EFFECT RADIUS:** 550

ACTIVE: **Aphelios** enters an onslaught for 1.75 seconds, gaining **20% (+ 10% per 100 AP) bonus movement speed** and automatically performing up to 6 (+ 2 per 100% **bonus attack speed**) attacks over the duration against the nearest visible enemy, prioritizing enemy champions.

Attacks alternate between *Severum* and his current **off-hand** weapon, each dealing **10 – 40 (based on level) (+ 22% – 40% (based on level) bonus AD) physical damage**, affected by critical strike modifiers, and applying on-hit effects, with on-hit damage reduced to 25%

effectiveness.

Aphelios cannot cast  Phase nor  Moonlight Vigil during Onslaught, but he is still able to move. He cannot perform attacks while unable to declare basic attacks.

[Map-Specific Differences Video](#)

Gravitum, the Gravity Cannon

[Edit](#)

COST: 1 MOONLIGHT PER ATTACK

Basic attacks with **Gravitum**  slow enemies by 30% for 2.5 seconds, decaying to 10% after 0.7 seconds.

 ["Gravitum."](#)

Binding Eclipse

[Edit](#)

COST: 10 MOONLIGHT + 60 MANA **COOLDOWN:** 12 – 10 (BASED ON LEVEL)

CAST TIME: 0.3 **EFFECT RADIUS:** GLOBAL

 **GRAVITUM - ACTIVE:** **Aphelios** expunges all enemies with Gravitum's  slow debuff, dealing **50 – 140 (based on level)** (+ **32% – 50% (based on level)** **bonus AD**) (+ 70% AP) **magic damage** and  rooting them for 1 second.

Binding Eclipse also empowers in-flight Gravitum projectiles to instantly affect their targets upon applying the slow successively.

[Hide Gravitum Details](#)[Binding Eclipse Details](#)

[Map-Specific Differences Video](#)

Infernum, the Flamethrower

[Edit](#)

COST: 1 MOONLIGHT PER ATTACK

Basic attacks with **Infernum** shoot a fire bolt that upon arrival splits into a cone of 4 lesser bolts behind the target, dealing damage to enemies they pass through. The fire bolt deals **110% AD physical damage** to the primary target. Secondary targets hit by any bolt are dealt 75 / 100% (based on level) of the triggering **attack's damage**, reduced to 23 / 30% (based on level)

against  minions.

 Critical strikes instead spray 6 missiles in a 50% wider cone. Secondary targets hit count as being  critically struck but do not take any additional damage.

 "Infernum."

Duskwave

COST: 10 MOONLIGHT + 60 MANA **COOLDOWN:** 9 – 6 (BASED ON LEVEL)
CAST TIME: 0.4 **TARGET RANGE:** 650 **ANGLE:** 40°

ACTIVE: **Aphelios** unleashes a wave of energy in a cone in the target direction, dealing 25 – 65 (based on level) (+ 56% – 80% (based on level) **bonus** AD) (+ 70% AP) physical damage to all enemies hit and locking onto each of them. After 0.25 seconds, **Aphelios** then fires a volley of attacks at each locked-on target from his current **off-hand** weapon, dealing **100% AD physical damage** and applying  on-hit effects. The damage is affected by  critical strike modifiers. There is no  range limit for locked-on targets.

Map-Specific Differences Video

Crescendum, the Chakram

[Edit](#)

COST: 1 MOONLIGHT PER ATTACK
SPEED: 600 (+ 75 PER 10% **BONUS** ATTACK SPEED)

Basic attacks with **Crescendum** hurl the blade at the target, which lingers for 0.25 seconds before homing back to **Aphelios**. He is unable to declare basic attacks until he retrieves **Crescendum**, but the attack timer is reset once caught.

Whenever **Aphelios** casts an ability that would require him to throw **Crescendum**, he instead fires a spectral *Chakram* at the target that similarly returns to him. **Aphelios** accumulates the *Chakrams* he catches, up to 20, which last for 5 seconds or until **Crescendum** is depleted of *Moonlight*. Attacks with **Crescendum** against  champions will refresh the duration of *Chakrams*.

Basic attacks with **Crescendum** are empowered to deal 0% – 138.5% (based on number of Chakrams) AD **bonus** physical damage and have a

10.67% wind up percentage, decreased to 6.67% when

 critically striking. The **bonus** damage from *Chakrams* is affected by  critical strike modifiers.

 "Crescendum."

Sentry

COST: 10 MOONLIGHT + 60 MANA **COOLDOWN:** 9 – 6 (BASED ON LEVEL)

CAST TIME: 0.25 **TARGET RANGE:** 475 **EFFECT RADIUS:** 500

ACTIVE: **Aphelios** deploys a lunar sentry at the target location that arms after 0.35 seconds, lasting for up to 20 seconds, during which it is inactive and  untargetable. The sentry activates if an enemy is within range of it, reducing its duration to 4 seconds and becoming targetable. Sentries have 6 **health** and take 3 damage per  ranged basic attack and 4 damage per hit by abilities.  Turret attacks destroy sentries instantly.

The sentry grants  sight of its surroundings and autonomously attacks the nearest visible enemy in range with a replica of **Aphelios'** current **off-hand** weapon, dealing 35 – 125 (based on level) (+ 42% – 60% (based on level) **bonus** AD) (+ 50% AP) **physical damage** per hit. The sentry can  critically strike for (175% +  40%) damage and benefits from both **Aphelios'**  attack speed and  **critical strike chance** at 100% effectiveness.

See Pets for more details about the sentry. Sentry will cast at max range if cast beyond that.

Phase

Edit

CAST TIME: NONE **STATIC COOLDOWN:** 0.8

ACTIVE: **Aphelios** switches between his **main weapon** and **off-hand** weapon over 0.25 seconds.

Weapon Queue System

[Edit](#)

The icon of this ability reflects the next weapon that is in reserve.

ACTIVE: **Aphelios** receives a text prompt of the weapon **Alune** will create next.

Moonlight Vigil

[Edit](#)

COST: 100 MANA **COOLDOWN:** 120 / 110 / 100 (BASED ON LEVEL)

CAST TIME: 0.6 **TARGET RANGE:** 1300 **EFFECT RADIUS:** 300

SPEED: 1000

ACTIVE: Aphelios casts forth a lunar spotlight in the target direction that briefly grants sight of the area along its path and stops upon illuminating an enemy champion. **Alune** smites the area centered on the illuminated target, dealing 125 / 175 / 225 (based on level) (+ 20% **bonus AD**) (+ 100% AP) **physical damage** to enemy champions struck and locking-on to each target hit, as well as granting sight of the area for 2 seconds.

After 0.3 seconds of the illumination, attacks based on **Aphelios'** current **main weapon** will launch from the sky against each locked-on target, dealing **100% AD physical damage** and applying on-hit effects. These attacks can critically strike for (120% + 40%) damage. There is no range limit for locked-on targets.

CALIBRUM: Applies an empowered mark that deals 50 / 80 / 110 (based on level) **bonus physical damage** per *mark* consumed.

SEVERUM: Heals **Aphelios** for 250 / 350 / 450 (based on level) if at least one enemy champion is hit.

GRAVITUM: Increases the initial slow to 99% and empowers *Binding Eclipse* to root targets affected by the enhanced slow for 1.35 seconds.

INFERNUM: The initial blast deals 50 / 100 / 150 (based on level) (+ 25% **bonus AD**) **bonus physical damage**. [The attack instead deals **110% AD physical damage** against locked-on targets, and causes an explosion of bolts in a 400-radius circle that deals 74.25 / 99% (based on level) AD physical damage to targets hit.] Enemy champions will take damage from overlapping areas.

CRESCENDUM: Generates 5 additional spectral *Chakrams* that return to **Aphelios** from the first enemy champion hit, for a total of 6, on top of those from other targets hit.

Original

 975 11.12.2019

Emerging from moonlight's shadow with weapons drawn, Aphelios kills the enemies of his faith in brooding silence—speaking only through the certainty of his aim, and the firing of each gun. Though fueled by a poison that renders him mute, he is guided by his sister Alune in her distant temple sanctuary from where she pushes an arsenal of moonstone weapons into his hands. For as long as the moon shines overhead, Aphelios will never be alone.

Trivia

Aphelios means "furthest from the sun".^[2]

It comes from [Greek](https://en.wikipedia.org/wiki/Greek_language) (https://en.wikipedia.org/wiki/Greek_language), "apo" means "far apart, away"^[3] and "Helios" is the [Titan god](#) (<http>

s://en.wikipedia.org/wiki/Helios) of the sun,^[4] the latter element being shared with  Aurelion **Sol**.

In astronomy, "aphelion (https://en.wikipedia.org/wiki/Apsis#Perihelion_and_aphelion)" means "the point in the orbit of an object where it is farthest from the Sun" also has the same origin.

His sister's name *Alune* is possibly based on Latin (<https://en.wikipedia.org/wiki/Latin>) *luna*, which shares the same PIE root **lew-* as  Lux and  Lucian.^[5]

 **Aphelios** and  **Alune** are possibly inspired by the Sun and Moon twins (https://en.wikipedia.org/wiki/Proto-Indo-European_mythology#Sun_and_Moon) from Indo-European mythology (https://en.wikipedia.org/wiki/Proto-Indo-European_mythology); albeit that both twins belong to the Lunari order.

Aphelios is the first champion that has less than four abilities.

A unique HUD is used due to the unorthodox arrangement of his kit.

Aphelios has a game start ceremony that forces him in place.

Aphelios is the only champion in League of Legends who can obtain the highest amount of Lethality.

Since Aphelios can hold two weapons at a time with  The Hitman and the Seer, there are 10 different possible combinations of weapons he can have equipped. These are:

-  Calibrum and  Severum
-  Calibrum and  Gravitum
-  Calibrum and  Infernum
-  Calibrum and  Crescendum
-  Severum and  Gravitum
-  Severum and  Infernum
-  Severum and  Crescendum
-  Gravitum and  Infernum
-  Gravitum and  Crescendum
-  Infernum and  Crescendum

Aphelios was associated with a meme known as '200 years' (<https://www.youtube.com/watch?v=eeMBHy6j69E>) that stemmed from a champion designer's controversial comments (<https://twitter.com/Lutzburg/status/1215043827586588672>) regarding game design experience. Despite the comment being in response to a conversation about  Wukong, the meme has been affiliated with Aphelios because the comment was made shortly after Aphelios's release, because Aphelios's kit was complex in both visual clarity and mechanics, and because Aphelios was extraordinarily strong during his release.

Aphelios's Series 2 Eternals make the following references:

Perfectly Balanced is a reference to Thanos (<https://marvelcinematic>

universe.fandom.com/wiki/Thanos) from the *Avengers: Infinity War* (https://en.wikipedia.org/wiki/Avengers:_Infinity_War) MCU (https://en.wikipedia.org/wiki/Marvel_Cinematic_Universe) superhero movie.
